- New York Metro Area

FOCUS ON QUALITY

Heister House Millworks has been manufacturing unfinished, hardwood flooring since 2002. Our Central Pennsylvania facility is located right in the heart of "hardwood country" with many species being logged within miles of our plant. We specialize in local species such as Red Oak, White Oak, Hickory, Maple, and American Cherry.

Quality is the top priority for Heister House. We may not be the highest volume manufacturer in the market, but we're certain that you'll love our quality. Our milling is second to none and we utilize an in-line moisture meter to check the moisture content of every board. We don't want you to have any problems with our floors. Local installers insist on Heister House brand flooring.

A Fine Tradition in Wood Since 1988.

At Heister House, we're not trying to become the biggest unfinished flooring manufacturer, but we would like to expand our reach into the middle Atlantic market. As such, we're offering regularly scheduled, free delivery to the metropolitan markets of Baltimore, Washington DC, Philadelphia, and New York.

CAPABILITIES

We may be a small operation, but we offer many of the same capabilities as the larger manufacturers. We mill with state-of-the-art Weinig moulders and have the ability to run boards up to 11-1/4" wide and our end matching operation can handle products up to 9-1/4" wide and 10' long. If you're prefinishing the floor, we can apply a micro-bevel to all sides.

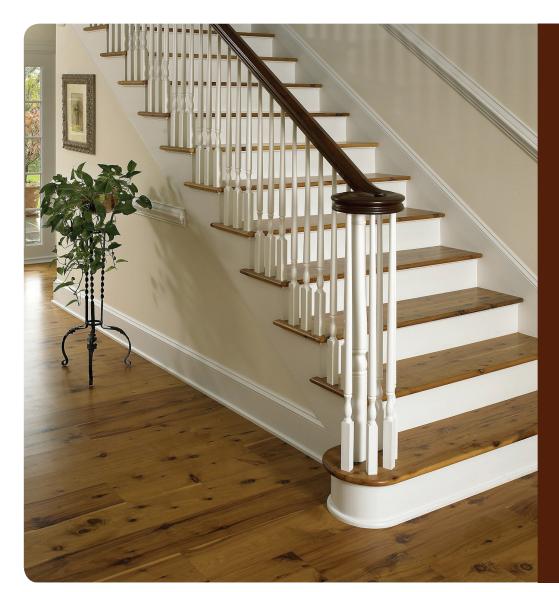

STAIR PARTS

Just like our flooring, quality is the focus for Heister House stair parts. We offer a wide variety of products in a multitude of wood species, allowing your stairs to be a perfect match to your flooring. And, our custom capabilities and skilled craftsmen give us the ability to fulfill nearly any product request. We even apply a back relief to our replacement treads in order to prevent cupping and warping.

ASSEMBLED RAILING SYSTEMS

Heister House produces its own line of assembled railing systems. We offer a straight rail and a sloped rail which is adjustable to nearly any stairway application. These products are perfect for the DIY'er or anyone looking for an easy railing application and installation.

DESIGNS THAT INSPIRE... EXCELLENCE THAT ENDURES

Heister House Millworks is a premier local manufacturer of high quality wood mouldings, millwork and hardwood flooring products. The company was founded in July of 1988 when owners, Brad Lauver and Lorne Nipple, decided to merge their independent woodworking businesses into one operation. In its infancy, the company supplied wood mouldings to many of the local manufactured housing companies in the Susquehanna Valley.

While manufactured housing is still a core market for Heister House today, the company also sells to local home builders and remodelers. Recently, Heister House has expanded it's reach to the larger markets of Baltimore, Washington DC and Philadelphia.

Heister House's main office, located in Mt. Pleasant Mills, PA, features one of the most unique and comprehensive millwork showrooms on the East Coast. Homeowners from far and wide have utilized our showroom for design ideas and inspiration in selecting their mouldings, doors, hardwood flooring and custom millwork. Each of our showroom vignettes feature their own architectural detail and woodworking and collectively offer hundreds of style, design and wood options.
